Satisfaction**

Journey of AdornCommerce

2015

It is started back in 2015 with the vision of enhancing global ecommerce experience.

Initially with Magento only on our own. Also, the premises were just a small office.

We got our first two clients on a small scale work just to build a long term relationship.

2017

Moved to new, better and bigger premises.

Added 8 new handpicked members to the team & 5 new Clients.

Added "Wordpres/WooCommerce CMS" as a new services to offer to our clients.

2019

Added 6 new members having a better experience in the ecommerce industries & Now we had 13+ Clients with 80% retention ratio.

Team building and employee welfare was a primary aim now with work life balance.

More frequent fun events like birthday & festival celebrations, lunch/dinner outing & a small trip to "100 Acres Resort".

2021

Now, we started filling we are actually accelerating and our hard work started paying back.

Moved to new premises with the capacity of 30+ resources to bring new energy. 16+ Premium clients are cherry on the cake.

Long awaited and dream trip to "GOA".

PRESENT

Out of 20+ current clients, there are 4 clients with us for more than 5 years as of now.

Accrued Adobe Bronze Partnership to add values to our vision.

Still counting with many big dreams/goals to be achieved.

Why Choose Us?

01

Transparency & Trust

We do not believe in false commits, and maintain total transparencies with our clients. Gaining their trust at any cost is our only reward. We keep them updated with daily/weekly updates as per the need.

02

Management Team with Diverse Experience & Skills

In the top management we have a skilled members with proven technical and management experience to understand client's requirements thoroughly and deliver the bug free code withing the timeline. Adorn is getting prioritized by well established enterprise and emergin brands because of considerable experience, certifications & problem solving mindset of our management.

03

Complete End to End Solutions

We at Adorn provides end to end solutions to all your needs and build a process that takes system or service from beginning to end, and delivers complete functional solutions. We identifies the requirements by figuring our what is the actual need in order to enhance the our client's end users' experience.

04

Global Work Exposure

We are expanding our clients globally and providing them the best services and solutions based on their requirements. We are able to provide a reliable services to our overseas clients and making a global footprints.

05

We value your investment

We will automatically grow when our client will, so this is something we believe and do all it needs for our client's business growth. We will always value our client's investements and support strategic initiatives for their business growth, and more importantly we will keep trying to reduce our client's expenses. As we are here for long term relationship, money is a biproduct of it.

06

Data Security & Support

We can assure data security, protection of client's ideas, and projects. We always prefer to sign NDA before sharing the requirements and we hand over the full source code to our clients after the completion of the project and provide to full support afterwords.
